

# Cybersecurity Risk Assessment (NIST SP 800-171 / DFARS 7012)

The protection of unclassified federal information in nonfederal information systems, such as government contractors (DFARS 7012), is dependent upon NIST SP 800-171 as a disciplined and structured process for identifying the different types of controlled unclassified information (CUI) that are routinely used by federal agencies.

The Risk Assessment enables users to maintain and update the security posture over the course of time in a collaborative environment. Multiple individuals can access this system to continuously update their respective function in an organization and all can quickly see where the organization's compliance IAW NIST SP 800-171 at any moment in time.

800-171 Assessment Action Status	Inherent Risk		Residual Risk	
	Avg	Max	Avg	Max
Access Control - 31%	M	VH	M	VH
Awareness and Training - 0%	H	H	H	H
Audit and Accountability - 11%	H	H	M	H
Configuration Management - 0%	H	H	H	H
Identification and Authentication - 0%	H	H	H	H
Incident Response - 0%	H	H	H	H
Maintenance - 0%	H	H	H	H
Media Protection - 0%	H	H	H	H
Personnel Security - 0%	H	H	H	H
Physical Protection - 16%	H	H	M	H
Risk Assessment - 0%	H	H	H	H
Security Assessment - 0%	H	H	H	H
System and Communications Protection - 0%	H	H	M	H
System and Information Integrity - 28%	H	H	M	H

DEMO 800-171 - NIST SP 800 - 171 Assessment

Category: Access Control

NIST 800-171 Requirement	Security Families	Description	Date	Implemented	Docs	Risk Inh	Risk Res	Notes
3.1.1	Access Control	Limit system access to authorized users, processes acting on behalf of authorized users, and devices (including other systems).		Yes		M	M	Edit
3.1.2	Access Control	Limit system access to the types of transactions and functions that authorized users are permitted to execute.						Edit
3.1.3	Access Control	Control the flow of CUI in accordance with approved authorizations.						Edit
3.1.4	Access Control	Separate the duties of individuals to reduce the risk of malevolent activity without collusion.						Edit
3.1.5	Access Control	Employ the principle of least privilege, including for specific security functions and privileged accounts.						Edit
3.1.6	Access Control	Use non-privileged accounts or roles when accessing nonsecurity functions.						Edit
3.1.7	Access Control	Prevent non-privileged users from executing privileged functions and audit the execution of such functions.						Edit
3.1.8	Access Control	Limit unsuccessful logon attempts.						Edit
3.1.9	Access Control	Provide privacy and security notices consistent with applicable CUI rules.						Edit
3.1.10	Access Control	Use session lock with pattern-hiding displays to prevent access and viewing of data after period of inactivity.						Edit

The Rofori Cybersecurity Risk Assessment—NIST SP 800-171 is a cloud-based solution that helps to reduce risk through continuous assessment and scoring, based on your alignment to NIST SP 800-171. This Cybersecurity Risk Assessment is a fundamental component of an organizational risk management process. Risk assessments are used to identify, estimate, and prioritize risk to organizational operations, organizational assets, individuals, other organizations, and the country, resulting from the operation and use of information systems. In accordance with the NIST SP 800-171, the Rofori Risk Assessment lays out the entire Special Publication in an easy-to-use environment that a user can manage an organizations security program.

The Rofori Cybersecurity Risk Assessment's inherent and residual risk feature, nested with NIST SP 800-30, enables an organization to assess risk prior to and after mitigation measures are implemented. This feature serves as a core capability that enables an organization's ability to manage risk priorities and risk tolerance. The dashboard enables individuals at all levels of the organization to quickly see the organizational risk in accordance with their preferred cybersecurity standard. The current inherent and residual risk calculation is promptly displayed helping you understand your most critical risks within your organization and serves as a means to focus on implementing proper remediation to protect what is most important.

The Rofori Cybersecurity Risk Assessment was designed for easy implementation and delivery of risk status at-a-glance, in the form of a drill-down dashboard status display providing detailed visibility to your cybersecurity assessment status, as determined by your implementation response. Experience how the Rofori Cybersecurity Risk Assessment can make you more aware of the cyber risk in your business operations and help prioritize remediations while maintaining compliance with NIST SP 800-171!
