- ✓ Video Communications Design and Development

Executive Summary

Rofori Corporation is a cybersecurity solutions and software development company, providing services to commercial, not-for-profit, academia, and government organizations. Rofori excels in creating structured data platforms to address the increasing challenges of cybersecurity standards and legislative compliance, across the ecosystem of organizational processes and fragmented collaboration. Rofori offers innovative cloud solutions for assessing operational cybersecurity risk utilizing our Risk Assessment Solutions and cybersecurity talent utilizing CyberKnights: Assessment, Development, and Retention Portal. Our solutions leverage standards, and best practices widely adopted through the National Institute of Standards and Technology frameworks.

CyberKnights™

We are known for listening and understanding the needs of our clients. We leverage our knowledge, skills and experience to fill the technology and/or process gaps identified and mutually agreed upon with our customers. From these experiences and industry input/feedback, we have developed solutions critical to facing the challenges in the cybersecurity domain, i.e., solutions to help assess both the operational risk and the talent to mitigate the risk.
